Fraser Range Metals Group Limited

Fraser Range Metals Group is an early stage explorer of nickel, copper and gold in the Fraser Range region of Western Australia.

The Company is committed to the exploration of its Fraser Range project located approximately 215km east of Kalgoorlie, Western Australia and to the expansion of its portfolio of mineral resource opportunities.

Fraser Range Metals Group Limited (ASX:FRN) (**the Company**) is pleased to announce a geological reconnaissance survey is underway at its 100% owned Fraser Range Project, located within the Albany-Fraser Orogen. The survey is being undertaken by the mining and exploration contractors RSC Global Pty Ltd (**RSC**).

The survey will cover all three of the Company's exploration tenements and is intended to produce a geological and structural fact map of any outcrop that may lie within the tenement areas.

In parallel to the field mapping RSC is also undertaking an extensive review of all publicly-available data for the Fraser Range region, in order to provide a comprehensive summary report and digital data files of all previous work completed within the Company's tenure.

The final map, report and digital data files are expected to be received in mid-January and, together with the modelling and interpretation of the aeromagnetics and gravity surveys to be received from Southern Geoscience Consultants (**SGC**) in early February, will form a solid platform to base the next phase of exploration at the Fraser Range Project.

About the Fraser Range Project

The Fraser Range Project (**the Project**) is located within the Albany-Fraser Orogen and consists of a western set of tenements (E28/2390 and E28/2392) and a single eastern tenement (E28/2385). The Project is located on a major tectonic suture between the Eastern Biranup Zone and the Fraser Complex on the western edge of the major Fraser Range gravity high, and is positioned within a major northwest-trending linear structural corridor that creates a distinct break in the Fraser Range gravity anomaly. The tenements are located between 80km and 110km along trend from Independence Group's (ASX:IGO) major Nova-Bollinger nickel-copper deposit.

Forward-Looking Statements

This document may include forward-looking statements. Forward-looking statements include, but are not limited to, statements concerning Fraser Range Metals Group Limited's planned exploration program and other statements that are not historical facts. When used in this document, the words such as "could," "plan," "estimate," "expect," "intend," "may", "potential," "should," and similar expressions are forward-looking statements. Although Fraser Range Metals Group Limited believes that its expectations reflected in these forward-looking statements are reasonable, such statements involve risks and uncertainties and no assurance can be given that actual results will be consistent with these forward-looking statements.

Competent Person's Statement

The information in this report that relates to Exploration Results and Exploration Targets is based on and fairly represents information and supporting documentation prepared by Mr Aidan Platel (Non-Executive Director of Fraser Range Metals Group Limited). Mr Platel is a member of the Australian Institute of Mining and Metallurgy (AusIMM) and has sufficient experience of relevance to the styles of mineralisation and types of deposits under consideration, and to the activities undertaken to qualify as Competent Persons as defined in the 2012 Edition of the Joint Ore Reserves Committee (**JORC**) Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves. Mr Platel consents to the inclusion in this report of the matters based on his information in the form and context in which they appear.
