DRILLING UNDERWAY AT THE FRASER RANGE PROJECT

Fraser Range Metals Group Limited (FRN or the Company) is pleased to announce that drilling has commenced at its 100%-owned Fraser Range Project in Western Australia.

KTE Mining Services Pty Ltd (KTE) initiated the first drill-hole of a proposed 700m reverse circulation (RC) drilling programme over the nickel-copper target area of tenement E28/2385 at the Fraser Range Project in Western Australia.

The drilling programme will comprise 3 – 5 drill-holes to test five distinct EM plates that were modelled from a surface EM survey completed earlier this year.

A Schramm 450 drill-rig began drilling planned hole FRN-PLRC002 (Figure 1). The drilling programme is expected to be completed within three weeks.
Figure 1 – Planned drill-hole collars within the PoW and Aboriginal Heritage survey area (in green) within tenement E28/2385. The drill-holes are designed to test the anomalous EM plates within the nickel-copper target area.

Figure 2 – Tenement map of the Fraser Range showing location of the nickel target within the FRN tenure.

About the Fraser Range Project

The Fraser Range Project (the Project) is located within the Albany-Fraser Orogen and consists of a western set of tenements (E28/2390 and E28/2392) and a single eastern tenement (E28/2385). The Project is located on a major tectonic suture between the Eastern Biranup Zone and the Fraser Complex on the western edge of the major Fraser Range gravity high, and is positioned within a major northwest-trending linear structural corridor that creates a distinct break in the Fraser Range gravity anomaly. The tenements are located between 80km and 110km along trend from Independence Group’s (ASX:IGO) major Nova-Bollinger nickel-copper deposit.

Forward-Looking Statements

This document may include forward-looking statements. Forward-looking statements include, but are not limited to, statements concerning Fraser Range Metals Group Limited’s planned exploration program and other statements that are not historical facts. When used in this document, the words such as “could,” “plan,” “estimate,” “expect,” “intend,” “may,” “potential,” “should,” and similar expressions are forward-looking statements. Although Fraser Range Metals Group Limited believes that its expectations reflected in these forward-looking statements are reasonable, such statements involve risks and uncertainties and no assurance can be given that actual results will be consistent with these forward-looking statements.

Competent Person’s Statement

The information in this report that relates to Exploration Results is based on information compiled by Mr Aidan Platel, a Competent Person who is a Member of the Australian Institute of Mining and Metallurgy (AusIMM). Mr Platel is a Non-Executive Director of Fraser Range Metals Group Limited. Mr Platel has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration, and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the JORC Code. Mr Platel consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.
